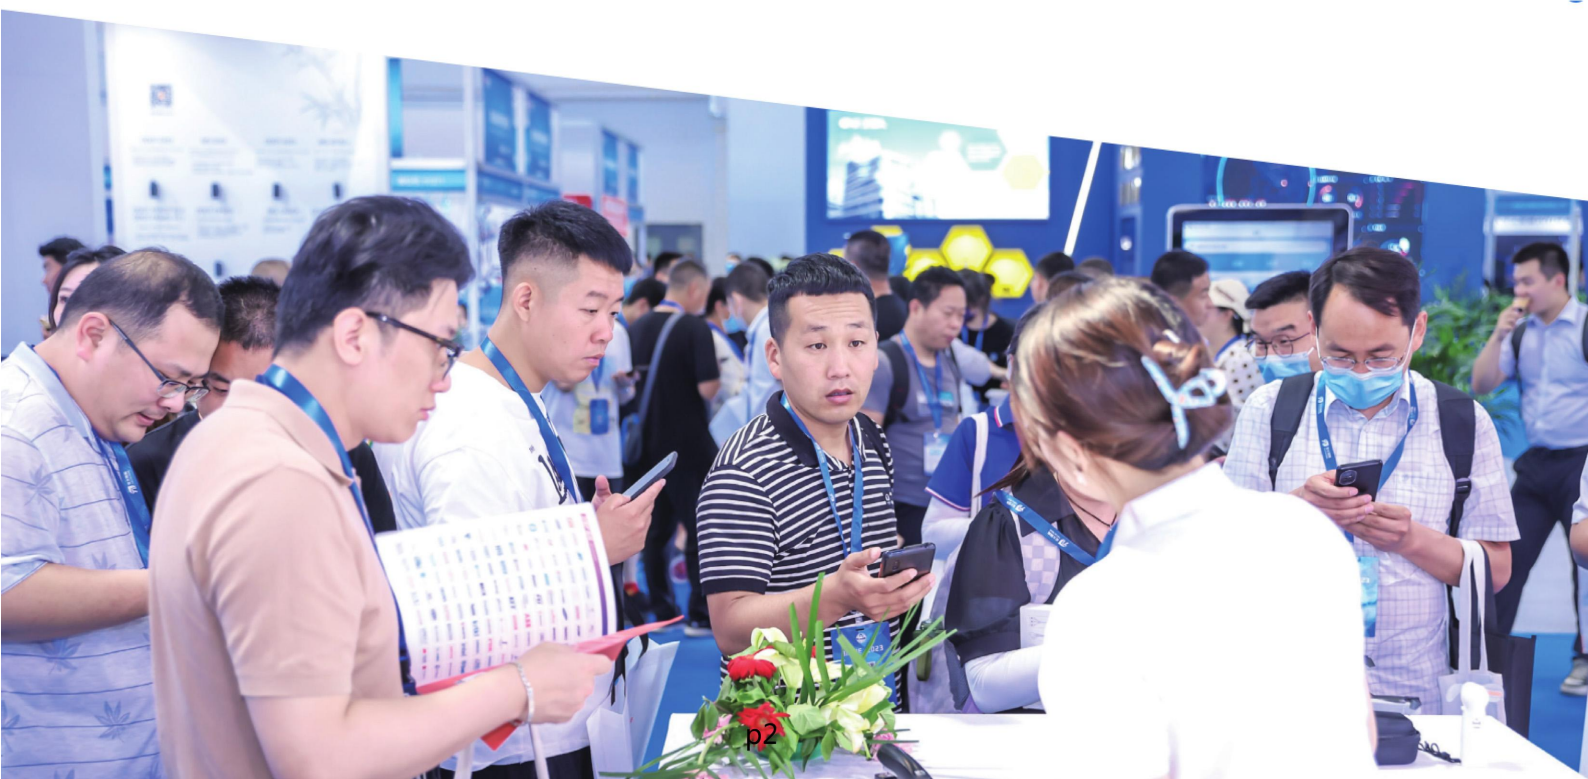

Exhibition Introduction

With energy revolution and technical breakthrough of China, new energy vehicles, as an environmental and energy saving way of travelling, have risen to the height of the national development strategy. The development of new energy vehicles is the only way for China to move from a big automobile country to an automobile power. Now, the new energy vehicle sales have led all the way in the automotive market, and the demand for power batteries ranks first in the world. All these make China become the world's largest new energy electric vehicle emerging market.

The charging systems, as an indispensable supporting facility for new energy vehicles, has also developed rapidly. The new technologies, such as AI, IoT, etc, will be applied to intelligent connected vehicle in the next few years, which leads innovation and development in vehicles manufacturing industry. The new energy vehicle industry will meet a broader development space and prospects with Chinese government's strong support on national policies and relative supply chains during China "14th Five -Year Plan" period.

For promoting new energy vehicle industry and responding national development strategy & policy, 2024 Beijing International New Energy Vehicle Technology and Charging Exhibition will open at 1-3, August, 2024 at China International Exhibition Center (New Hall).

At the exhibition, there are the latest technologies and new products. The exhibiting sectors, such as new energy vehicle technologies, power batteries, hydrogen energy & fuel cells, charging piles & technologies, intelligent connected vehicle electronics, battery systems & motor systems & electric control systems, new energy vehicle technologies & process equipment, offer you a nice business opportunity and platform. With 30000+ square metres space, 400+ exhibitors and 60000+ visitors, it will be "World first, China first" brand exhibition, as well as business cooperation chance for people who are engaged in the new energy vehicle industry.

Products List

New Energy Vehicle Technologies

battery technology, driving motor, electrical control system, thermal management technology, test & measurement, quality control & monitoring, new energy vehicle parts

Power Batteries

lithium battery, power battery and management system, battery cell, lithium battery material, detection equipment, lithium battery equipment

Hydrogen Energy & Fuel Batteries

fuel battery system, fuel battery key parts and supply technology, hydrogen equipment & technology

Charging Systems & Technologies

charging equipment, wireless charging pile products and technology, smart charging solutions, charging piles and supporting components, supporting facilities solutions, charging facilities construction operation solutions, power exchange equipment & technologies

Intelligent Connected Vehicle Electronics

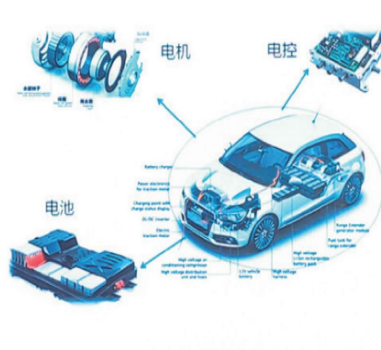

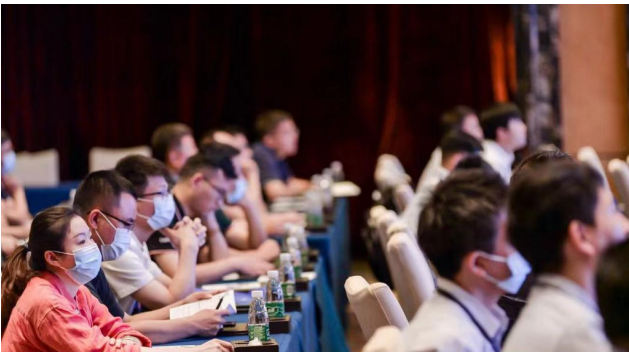

autonomous driving technology, intelligent auxiliary driving, automobile safety systems, sensors, GPS systems, car networking technology, cooperative vehicle infrastructure system, test & measurement, vehicle electronic equipment & components, semiconductor, vehicle electronics & intelligent hardware

Three “Electrics Systems”

battery systems & motor systems & electric control systems and relative products

New Energy Vehicle Technologies & Process Equipment

manufacturing technologies, body connection, components processing & packing, smart factories, logistics services, related supporting chains

Forums & Conferences

- New Energy Vehicle Design, R & D and Trial Summit
- New Energy Vehicle Intelligent Manufacturing Technology & Industry Exchange Conference
- New Energy Vehicle "Three Electrics Systems" Manufacturing & Engineering Conference
- New Energy Vehicle Core parts Innovation Conference
- New Energy Vehicle Power Battery Technology Future Development Forum
- New Energy Vehicle Thermal Management & Test Technology Development Forum
- Intelligent Connected Vehicle Summit
- New Energy Vehicle Charging Technology Development Forum

Booth Price & Advertisements

Booth Types	Luxury Booth	Standard Booth	Bare Booth
			
Size	3m*3m	3m*3m	m ² (36m ² min)
Price(\$)	4500	4200	400

front cover : 4500\$	back cover : 3050\$	front page : 2500\$	back page : 2000\$
color page : 950\$	double-page : 1300\$	tickets : 5500\$	Show Directory Advertisement (size: 210mm *145mm)
badges : 9000\$	hand bags : 9000\$	slings : 7500\$	

Why Exhibit ?

● Transformation and Upgrading of the Automobile Manufacturing Industry Achieve Huge Market Potential

As environmental and energy saving situation and the rapid development of the automotive industry, new energy vehicles have gradually attracted the governments' attention. With the deep integration of high-tech and advanced manufacturing technologies, China' s automobile manufacturing industry is entering the era of transformation, upgrading, digitization, green development, and huge market potential.

● Focusing on Industry Resources and Covering Wide Fields

It is a business platform including products and technologies display, technical forums, speeches, product promotion activities. Exhibitors can show their achievements in scientific & research, new products, also they can have exchanges and business negotiations with industry experts, government representatives and potential customers.

● Professional Visitors and Purchasing Delegations Make Efficient Business Opportunities

By the exhibition, the exhibitors can not only promote their brands, but also collect target customers and information for mastering trend of industry development and market, and for learning the direction of the automobile manufacturing industry.

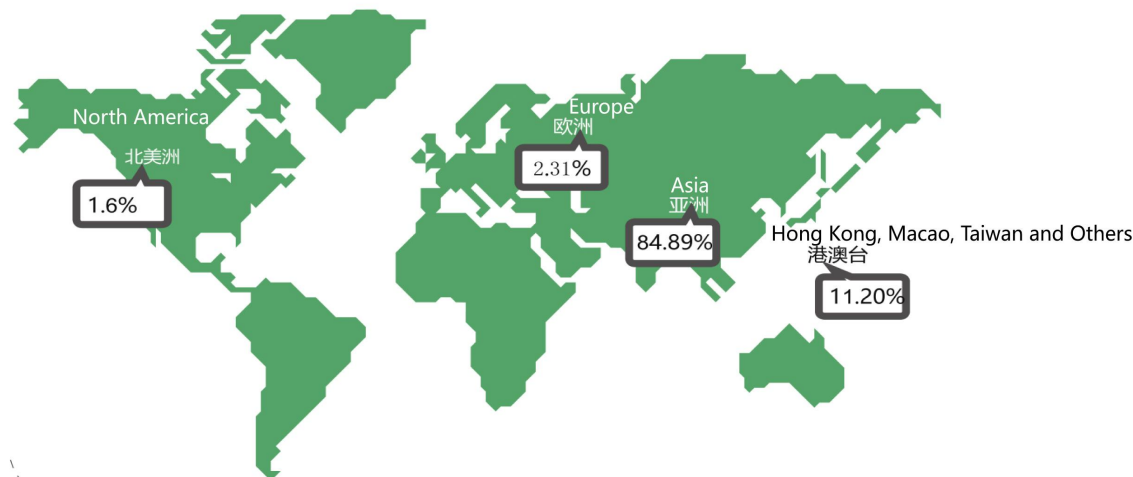

● Business Activities Converge Industry Elites

Focusing on the themes "New Energy Vehicle Technology" and "Charging Systems", there are activities of technical forums, speeches, product promotion, docking meetings. The government leaders, industrial associations, researchers, experts, scholars, industry elites, etc. are invited to communicate the industry hot spots, the bottleneck of developments.

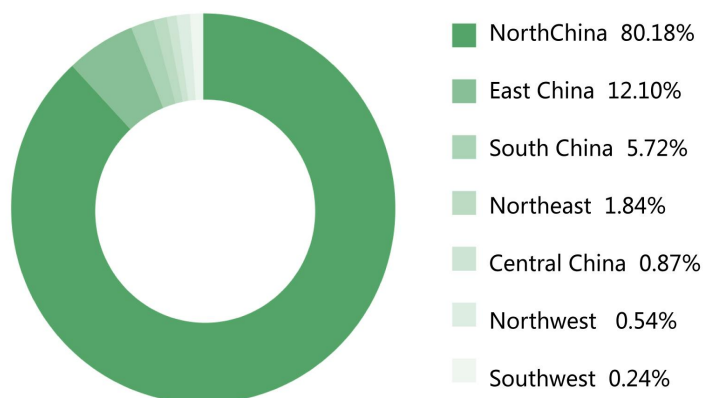

2023 Overview

For 3 days exhibition, 409 exhibitors, 635218 visitors and 32000 square metres space from 15 countries and regions attended the exhibition in 2023, which is the highest since its opening in 2007.

>> Visitors' Countries & Regions

>> Domestic Visitors

>> Participants' Statements

FAW China New Energy Vehicles Branch

This is an authoritative exhibition in new energy vehicle industry. The exhibitors, show space, participants and the experts in summit forums are top in China. This time, we attended the exhibition and brought new products. I think all these should be at high levels.

GAC Group AION

Our company participated the exhibition many times, and I can see lots of new products and advanced technologies. I hope this exhibition can be a business platform of gathering new energy vehicle industry brands at home and abroad. The new technologies and new products are constantly emerging, which helps to promote industrial development, learn about government policies, technical innovation and industrial market.

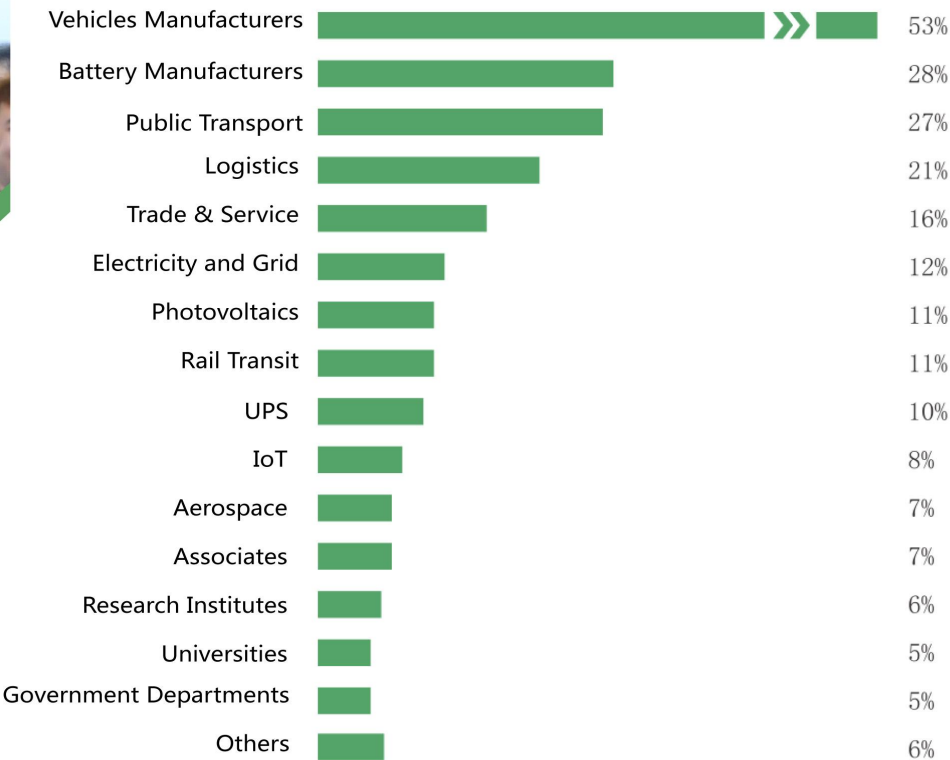

Shenzhen Winline Technology

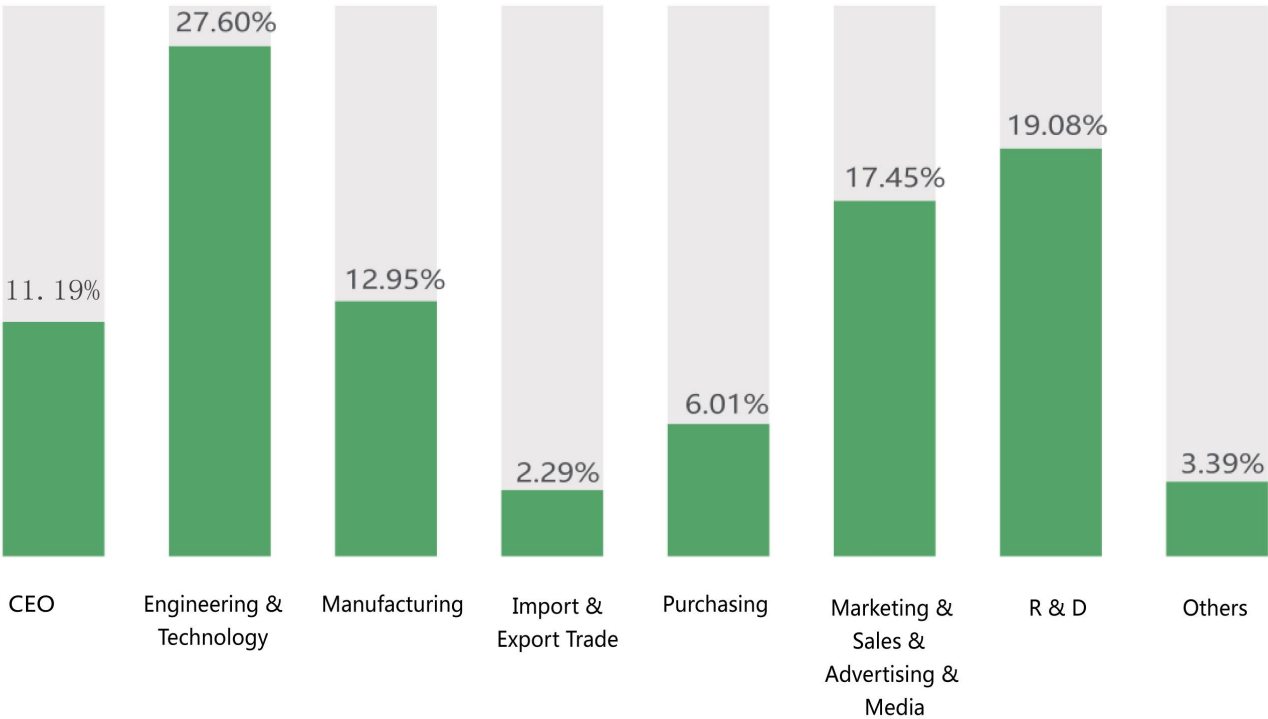

At the exhibition, we have highly competitive products. For example, charging solutions for the bus, high reliability charging pile in special harsh environment, four-shot charging pile. We want to display our latest products. At the same time, let more people know new energy vehicle industry and products.
